SUMMARY

A product leader with 25+ years of experience spanning user-centered design, engineering, and enterprise SaaS, with deep domain expertise in employment tax credits and e-commerce. I pair hands-on design and technical fluency with strategic product thinking and team leadership. I have shipped WOTC and federal and state tax credit software for 400+ enterprise clients, and spent 15+ years building e-commerce, from retail storefronts to enterprise B2B platforms spanning millions of SKUs. Passionate about building teams, aligning stakeholders, and shipping well-designed, operationally sound products.

EXPERIENCE

Head of Product & UI/UX | Trak Services (HRlogics)

Birmingham, AL (Remote) | 10/2023 - 10/2026

Owned product strategy, roadmapping, and end-to-end UX for an HR compliance suite built around WOTC and federal and state tax credit platforms, alongside Unemployment Cost Management, Employment & Payroll Verification, and I-9 products. Launched an enterprise SSO portal giving clients a single authenticated entry point into every product, and defined the vision for evolving it into a unified, browser-based workspace where each product runs as an integrated app. The suite ingested and normalized client data from ATS integrations for 400+ enterprise clients and 1,000+ active users. Managed a cross-functional development team across multiple simultaneous workstreams. Led a company-wide rebrand that extended into product infrastructure, designing and building the shared TypeScript component library that became the suite's design system. Engaged enterprise clients from pre-sales through deployment - onboarding each client, adapting every platform to their ATS, turning client needs into platform-wide improvements, and delivering C-suite release notes on launch.

Senior Product Designer | Fusion Worldwide

Boston, MA (Remote) | 10/2022 - 10/2023

Owned product direction, roadmapping, and all UI/UX decisions for a custom enterprise B2B e-commerce platform supporting a projected $1.5 billion in annual sales. Directed the front-end architecture overhaul, migrating from Tailwind to a custom component library built for scalability and design system consistency. Led stakeholder alignment across departments, managed an agile development team, and drove a turnkey solution integrating product, order, offer, and quote data across a catalog of millions of SKUs into a polished, cross-platform UI.

Lead Front-End Developer | Brand Labs

Rochester, MI (Remote) | 06/2021 - 05/2022

Served as lead front-end developer and technical architect on an Enterprise Magento B2B platform. Researched and selected ScandiPWA as the headless front-end framework, evaluating the stack and making the case for a React-based PWA approach over a traditional Magento frontend. Led development and customization of the React.js headless theme, delivering custom features including tailored product views, advanced payment methods, B2B invoicing, bulk shipping options, and a streamlined quoting system. Supported a full store migration to Magento, importing 11,000+ products with categories and metadata, and managed API imports spanning millions of SKUs alongside semantic versioning and Azure deployments.

Founder & Creative Director | Kismet

Detroit, MI | 06/2015 - Present

Founded and operated a full-service design and development studio for 10+ years, managing a client roster across retail, finance, healthcare, hospitality, and nonprofit sectors and owning every engagement from discovery through launch - brand strategy, UX design, and full-stack web development across web stores, marketing platforms, and custom internal tools. Designed and built a joint platform with NASA, Microsoft, and National Geographic that integrated NASA satellite data into a University of Alabama in Huntsville nonprofit initiative tracking algal growth in Lake Atitlán.

Director of Creative Technologies | Fishbat

Ronkonkoma, NY (Remote) | 10/2013 - 06/2015

Built and led a team of creative professionals spanning graphic, web, software, and marketing disciplines, delivering 10 e-commerce sites and 7 marketing sites - all responsive, built on flexible template systems that let clients maintain their own content without developer support. Rebranded start-ups and established companies whose identities had dated, and delivered emotionally driven design work for nonprofit clients.

UI/UX Developer & Software Tester | Neon Workforce Technologies

Gadsden, AL (Remote) | 01/2012 - 10/2013

Developed marketing websites across every branch of the company on a Concrete5 platform, and rebuilt the main staffing site with restructured HTML, organized CSS, and custom jQuery - improving usability, search visibility, and page-load speed. Built custom PHP applications, and tested releases against requirements, documenting defects and verifying fixes across scenarios before ship.

Chief Design Officer & UI/UX Developer | Brighter Technologies

Huntsville, AL | 09/2011 - 01/2012

Led the team in company branding, site architecture, SEO, and UI/UX development across the firm's web properties, collaborating closely on wireframes, flowcharts, information architecture, and software features. Designed and developed logos, themes, and widgets for custom PHP and CMS sites, and delivered full multimedia, branding, and marketing packages for local business clients. Reviewed and approved the jQuery, CSS, and HTML5 framework before release to production.

Website Manager & Graphic Designer | Loco-X

Huntsville, AL | 04/2010 - 07/2011

Helped develop the front-end integration of a motorcycle parts fitment filter by brand, model, and year, delivering an intuitive browsing experience for a multi-million-dollar storefront. Audited and imported clean product data for over a million SKUs, improving search visibility and enabling comparison-shopping engines, site filtering, and outbound data feeds. Designed 400+ advertisements and ran weekly newsletter campaigns to a 100,000+ subscriber list with A/B testing.

Assistant Webmaster | Moosejaw Mountaineering

Madison Heights, MI (Remote) | 01/2007 - 08/2009

Analyzed catalog data to identify and correct product information, descriptions, and front-end functionality for an outdoor retail e-commerce store. Maintained imagery and original copy across current, new, and carryover lines, and organized creative for daily newsletters reaching hundreds of thousands of subscribers.
